Subject: Superfan

Dear Jan,

We are delighted to with the performance of our new Superfan whole-house fan, and with the quality installation performed by Joe and Sean. Our bedrooms face the afternoon sun, and get quite warm by the time we go to bed. With the Superfan, we just press the timer button to run the fan for an hour or two. We then enjoy a cooled bedroom, and a nice refreshing movement of outside air into the bedroom too.

The system is very quiet and powerful! My son burned a pizza in the oven last week, and I turned on the fan, and all the smoke in the upstairs was evacuated promptly.

Joe and Sean had to deal with my 60-year old plaster ceilings, and their vent installations are perfect.

The job was completed on time, and the rooms were so clean there was no trace of the work accomplished!

I would not hesitate to use Joe and Sean again, and welcome the chance to provide you with references in the future.

Sincerely,

Peter and Susan Kendall
Orinda, CA
